Dr. Charles C. Brinton  
Department of Biophysics  
University of Pittsburgh  
Pittsburgh 13, Pennsylvania

Dear Dr. Brinton:

In view of our studious silence, it would not surprise me that you had concluded that we had forgotten all about your application. This is not the case but it unavoidably is taking quite some time to settle questions of space. We are coming to a conclusion on this and I hope to be able to give you some final word in about a week. If you have meanwhile made any irrevocable commitments elsewhere I would appreciate your letting us know about this. As I had indicated earlier the one type of position that may be vacant would be a post-doctoral fellowship or traineeship but the stipends for these have been adjusted so as to be reasonable attractive especially when calculated after taxes. At the moment, space rather than interest or stipends is the limiting factor.

Yours sincerely,

Joshua Lederberg  
Professor of Genetics
